

MAJIDULLA SK

DevOps Engineer | Cloud & DevSecOps | CI/CD Automation

Hyderabad, Telangana, India | +91 6294412062 | majidullask04@gmail.com | [linkedin.com/in/majidulla-sk](https://www.linkedin.com/in/majidulla-sk) | github.com/Majidullask04

PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student and DevOps Engineer with hands-on, verifiable experience building Jenkins DevSecOps CI pipelines, containerized full-stack applications, and Kubernetes (K3s) deployment configurations. Practiced in integrating Gitleaks, SonarQube, and Trivy into CI workflows and deploying via Docker to AWS EC2. Actively contributing documentation to CNCF open source projects. Seeking DevOps, Cloud Engineering, or Platform Engineering opportunities.

TECHNICAL SKILLS

- **CI/CD:** Jenkins (Declarative Pipelines), GitHub Actions
- **DevSecOps:** Gitleaks (secret scanning), SonarQube (SAST, Quality Gates), Trivy (filesystem & image vulnerability scanning)
- **Containers & Orchestration:** Docker, Docker Compose, Docker Hub, Kubernetes, K3s
- **Cloud:** AWS (EC2, S3, IAM), Linux (Ubuntu), Bash/Shell Scripting
- **Observability (design/documented):** Prometheus, Grafana, Loki, Argo CD (GitOps)
- **Languages & Frameworks:** Python, JavaScript, TypeScript, Bash, React, Vite, Node.js/Express, FastAPI
- **Databases & Tools:** MongoDB, MySQL, Git, GitHub, Nginx, Postman, YAML

PROJECT EXPERIENCE

DevSecOps CI Pipeline for a 3-Tier Node.js Application [View Repository](#)

Jenkins | Gitleaks | SonarQube | Trivy | Node.js

- Designed and iterated a 7-stage declarative Jenkins pipeline: Git checkout, frontend/backend syntax validation (node --check), Gitleaks secret scanning, SonarQube SAST with Quality Gate enforcement, and Trivy filesystem vulnerability scanning.
- Verified pipeline behavior through real execution — builds completing end-to-end in ~27 seconds, and the pipeline correctly blocking merges on SonarQube Quality Gate failures.
- Authored the extended production architecture for GitOps delivery of a 10-service microservices application: Jenkins → Docker Hub → Argo CD → K3s → Prometheus/Grafana/Loki (documented in a companion architecture repo).

ExamAid Pro — Full-Stack Study Platform [View Repository](#)

React | Vite | TypeScript | FastAPI | Jenkins | Docker | AWS EC2

- Built and maintain a full-stack exam-prep application (Vite/React/TypeScript frontend, FastAPI backend) through a PR-based Git workflow with 100+ commits.
- Resolved SonarQube security hotspots flagged in code review and integrated an AI-assisted study feature.
- Designed a Jenkins CI/CD pipeline incorporating Gitleaks, SonarQube, and dual Trivy scans (filesystem + image), containerizing the app into a single Docker image for deployment to AWS EC2.

Node.js REST API — Kubernetes Deployment [View Repository](#)

Node.js | Express | MongoDB | Docker | Kubernetes | K3s

- Extended a Node.js/Express/MongoDB REST API with Kubernetes and K3s deployment manifests, iterating across multiple commits to get the containerized API running on-cluster.
- Managed authentication provider configuration (Google/Twitter OAuth) and dependency upgrades (bcrypt) for production readiness.

Three-Tier Full-Stack Application — Performance Refactor [View Repository](#)

React | Docker | Docker Compose

- Refactored Student and Teacher components in a Dockerized three-tier application to use useCallback, reducing unnecessary re-renders in the CI-deployed React frontend.

AWS Amplify Authentication App [View Repository](#)

React | Vite | AWS Amplify Gen 2

- Built and iterated a React/Vite application on AWS Amplify Gen 2, implementing single-user authentication.

OPEN SOURCE

- Contributing documentation to a CNCF project (GitHub issue #359), clarifying LFX Crowdfunding usage guidance for project maintainers.
- LFX Open Source Program — Completed | MLH Global Hack Week — Participated

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Brilliant Institute of Engineering and Technology (JNTUH), Hyderabad, Telangana | 2023 – 2027 | CGPA: 7.5

CERTIFICATIONS

AWS Certified Cloud Practitioner (Preparing) | CKA (Preparing) | Terraform Associate (Preparing) | LFX Open Source (Completed)
